

Hatch Embroidery 3.1.6 – Release Notes

Release Date: August 2025

This update focuses on one big thing: a smoother, more reliable experience when using Hatch.

We've made behind-the-scenes improvements to reduce crashes and make the software more stable—especially when switching modes, editing designs, or working with lettering and graphics. If you've ever had Hatch unexpectedly close, this update should make those moments much less likely.

To get the best results, make sure your computer has the **latest Windows updates** installed and meets our **recommended system specifications**. [Click here to check requirements.](#)

Final Notes

We highly recommend updating to Hatch Embroidery 3.1.6 for a smoother and more reliable creative experience.

If you continue to encounter any issues, our support team is here to help—just reach out!

Thank you once again for your continued support and creativity with Hatch Embroidery!
